

# EDESIRI OHWOMADO

## SOFTWARE ENGINEER

[in LinkedIn](#) | [edesiri.com](mailto:hi@edesiri.com) | [hi@edesiri.com](mailto:hi@edesiri.com) | [GitHub](#)

### PROFESSIONAL SUMMARY

Final-year Computer Science student with hands-on experience at AWS, enterprise projects, and as a startup technical lead. Skilled in full-stack and cloud-native development, building scalable platforms and analytics tools that drive measurable impact.

### HONORS & AWARDS

- **Undergraduate Computer Science Excellence Scholarship:** Issued by the Department of Computer Science, University of Sheffield
- **Top Performing Student - International Foundation Year:** Issued by NCUK - The University Consortium

### SKILLS

**Frontend:** HTML5 | CSS3 | JavaScript | Typescript | React.js | Next.js

**Database:** PostgreSQL | MySQL | MongoDB (NoSQL)

**Backend:** Java | Spring Boot | Node.js | Nest.js | Python | Django

**Tools:** Git | Github | Figma | Notion

### EDUCATION

#### The University of Sheffield

#### BSc Computer Science

Expected Graduation - June 2026

- Relevant modules: Software Engineering, Web and Internet Technology, Java, Algorithms and Data Structures, Systems Design and Security, Data Driven Computing,

### WORK EXPERIENCE

#### Amazon Web Services (AWS)

#### Software Development Engineer (Intern)

06/2025 - 09/2025

**Technologies:** AWS Kinesis, Lambda, DynamoDB, API Gateway, CloudWatch, IAM, S3, CloudFormation, React, TypeScript

- Built observability tooling for a large-scale AWS serverless billing system, helping engineers trace account-processing journeys and debug issues faster.
- Designed and implemented an event-driven serverless data pipeline using Kinesis, Lambda, and DynamoDB to support high-volume operational visibility.
- Developed a React/TypeScript dashboard for account-level timelines, latency insights, error tracking, and dependency visualisation.
- Prevented **1–2 customer-impacting incidents monthly** and saved **15–20 engineering hours/month** through automated correlation and streamlined troubleshooting.
- **Implemented CloudWatch monitoring** for event ingestion and endpoints, delivering **real-time visibility** into system health and performance.

#### Rime Technology Ltd

#### Technical Lead

01/2024 - 07/2025

- Led a 5-member engineering team to build Rime, a creator–brand collaboration platform onboarding **5,000+ creators and 200+ brands across Africa**.
- Designed and implemented full-stack architecture with NestJS, Next.js, TypeScript, and PostgreSQL enabling **automated campaign management and real-time analytics** for brand campaigns.
- Integrated Meta and TikTok APIs, enabling brands to track performance metrics for creator videos, **improving campaign performance monitoring**.
- Established engineering best practices, CI/CD pipelines, and scalable systems, reducing deployment errors by **80%** and supporting rapid feature rollout.
- Delivered a platform that enabled brands to **run campaigns reaching millions of impressions**, driving measurable ROI and authentic creator marketing at scale.

#### Bluechip Technologies

#### Java Software Engineer (Intern)

06/2023 - 09/2023

- Reengineered the **notification system** (email, SMS, in-app) for Vodacom DRC's Market Hub e-commerce platform, reducing delivery failures by **20%** and improving reliability for mobile transactions.
- Optimized KPMG Compensation and Benefits database queries and built a Java payroll analysis tool, **reducing manual effort by 40%** and improving data retrieval speed by **25%**.
- Collaborated with QA and product teams on Cash Complete ERP for Zenith, GT, and Providus Banks, **resolving critical front-end bugs** and reducing response time by **15%**.
